

## SmartGate R5.2 Release Notes

Version 1.1

May 3, 2007

These release notes contain the following information:

What's New in Release 5.2  
Configuration Notes and Known Issues

### What's New in Release 5.2

- SmartPass support for Microsoft Windows Vista.

### SmartPass Support for Microsoft Windows Vista

With version 5.2, the SmartPass Windows client supports Windows Vista. For instructions that describe how to update the SmartGate server to deliver the version 5.2 SmartPass, refer to the appropriate section based on the SmartGate server version.

- [How to Update a Client from v4.6 to v5.2 on a SmartGate Server v4.6](#)
- [How to Update a Client on a SmartGate 5.1 Server](#)

### How to Update a Client from v4.6 to v5.2 on a SmartGate Server v4.6

This section describes how to update a SmartPass Windows client to version 5.2 on a SmartGate server. Note that Perl must be installed on the SmartGate server.

#### *Pre-requisite*

Before you begin, Perl must be installed on the Windows server. To download Perl, go to <http://activestate.com/Products/ActivePerl/>

To update a client from version 4.6 to version 5.2 on a SmartGate server running version 4.6, do the following.

1. Unpack the SmartPass package from the SP-5.2-Win32-\*.zip archive.
2. Clear the Read-Only attribute on all unpacked files.
3. Make a backup copy of all files from "%PROGRAMROOT%\V-ONE\SmartGate/packages/" folder.
4. Remove the files from this folder and then copy all of the \*.cab files from the unzipped archive to "%PROGRAMROOT%\V-ONE\SmartGate/packages/".
5. Make a backup copy of all files from "%PROGRAMROOT%\V-ONE\SmartGate/client/" folder.
6. Empty the contents of the folder and then copy all of the files from unzipped archive here ("%PROGRAMROOT%\V-ONE\SmartGate/client/").
7. Copy the file "smartpass.ini.template" to the "%PROGRAMROOT%\V-ONE\SmartGate\data/" folder.
8. Make a backup copy and then replace file "update\_client.pl" in folder "%PROGRAMROOT%\V-ONE\SmartGate/".

9. Rebuild the user's client with update\_client.pl script, as usual.

### How to update a Client on a SmartGate 5.1 server

This section describes how to update a SmartPass Windows client on a SmartGate 5.1 server. Note that Perl must be installed on the SmartGate server.

#### *Pre-requisite*

Before you begin, Perl must be installed on the Windows server. To download Perl, go to <http://activestate.com/Products/ActivePerl/>

To update a client on a SmartGate server running version 5.1, do the following.

1. Unpack the SmartPass package from the SP-5.2-Win32-\*.zip archive.
2. Clear the Read-Only attribute on all unpacked files.
3. Replace files in the %PROGRAMROOT%/AEP/SmartGate/packages folder with the appropriate files from the unzipped archive.
4. Replace the files in the %PROGRAMROOT%/AEP/SmartGate/client folder with the appropriate files from the unzipped archive.
5. Rebuild the user's client with update\_client.pl script, as usual.

Trusted. Certified. Secure.
